"Freeways"

Someone once said, "In Los Angeles you are what you drive!" It's true. The automobile says a lot about the lifestyle you lead. Probably more than anywhere else in The United States, the car is both a status symbol and a necessity in Los Angeles. As the second largest city in The United States, Los Angeles stretches horizontally from the pier at Santa Monica to the San Bernadino Mountains. Statistics show that there is an average of 3 cars per family in Los Angeles, and more BMW, Mercedez Bens and Porsche than in all of Germany. What makes the statistic even more interesting is the fact that there are no automobile makers in California. However, as the number of cars on the Los Angeles Freeways increased over the years, traffic became a major problem, and only in the land where stars are born overnight could there be a solution as creative as this one. Actually, the idea was very simple.

Since most of the freeways near downtown have three or more lanes, one of them would be designated as a "carpool lane." In other words, one of the lanes would be reserved for automobiles or vans with 4 or more people. This would eliminate many of the traffic jams, motivate drivers to save gas by forming car pools, not to mention the reduction in "smog" or air polution, another part of Los Angeles life. In short, the idea was a success. By the way, if you decide to visit Los Angeles, and take the Santa Monica or San Diego Freeways, don't even think about driving in the "car-pool lane" by yourself! Some say the ticket is about $ 1.000 dollars.

Let's Go Shopping

Americans love to shop, and they probably do it better than anyone else in the world. Since the U.S. is the largest consumer economy in the world, Americans have become the greatest shoppers in the world. In fact, the local mall has become more than just a simple shopping center. It has become a place for breakfast, lunch and dinner. Today, people meet, date and even get married in malls. It's not uncommon to find a supermarket at the mall, so people buy all of their groceries there too. How about a movie? No problem. There are malls today with as many as 10 theaters.

Maybe you're wondering . . . How big are these malls? The Del Amo Mall, which is located in Torrance, California, covers five city blocks. One of the world's largest malls is located in Edmonton, Canada and contains a lake inside its complex. The Mall of America in Minneapolis offers enough parking space for all of the cars in most small U.S. cities, and it is listed as one of the "Wonders of the Modern World." So, if you're interested in meeting Americans and seeing them doing what they do best, go have lunch at the mall, spend a little money there, watch a movie and a little good advice, don't forget where you park your car!

SPORTS AND SPONSORS

Somebody once called Baseball the "Great American Pastime." However, today in The United States it has become more than just a simple pastime. Professional sport has become big business, and that means big bucks! Maybe you've never stopped to think about how much money is involved in pro sports, or how much money a major sponsor pays for a team to wear its logo, jackets, socks, etc.

For example, you may not know that Nike is now paying millions of dollars to the Brazilian Soccer team to wear their "swoosh" logo on the Brazilian team's uniform. I said millions, not thousands. Just stop for a minute and try to imagine how many people see that logo on the uniform in a 90 minute match, and immediately look for Nike products, tennis shoes, etc. Very few people know exactly how much Michael Jordan makes to wear Nike tennis shoes and to make those incredible T.V. commercials.

Many pro athletes make more money in one year by sponsoring everything from kid's cereals to underwear than athletes in the past made over their entire sport's career. Today you can find Michael Jordan and Shakeel O'Neil's faces on toys, CDs, soap, yogurt and even on the big screen right next to Bugs Bunny. It's true, professional athletes make more by putting their faces on cereal boxes than on the playing field, basketball or tennis court. So, the next time you watch a Chicago Bull's game and see Jordan or Pippen make those final points at the buzzer, remember, for their sponsors it was a lot more than just two points.

Answer

1. What do Americans call baseball?
2. According to the text, what should you stop and think about?
3. What does the text say about the Brazilian Soccer team?
4. Where can you find Michael Jordan and other's faces?

Surfing Lessons

Paul: So, how about my surfing lessons?
Patty: Are you sure you want to learn?
Paul: Of course, I've been dreaming about this!
Patty: Great! Let's check out the waves at Oceanside.
Paul: By the way, in my dreams the water was warm. Is it?
Patty: This is California, the water is cold. Don't worry I'm going to take a wet suit.
Paul: Oh, you mean the black rubber suit that surfers wear when it's cold.
Patty: Yep! Surf's up! Let's go Paul.

Answer

New Cars and Gorillas

As you know, California is the land of the automobile. In fact, it's impossible to talk about California and not talk about cars. Remember, you are what you drive in California! However, over the years it has become very simple to finance a new car in California. Generally, the banks have three basic requirements. First, they require a minimum salary of US $ 1,000. Second, they require a minimum of one year at your job, and third, they require at least one year at your current residence.

Easy financing, however, means more collection problems for the banks. So, what happens when a person begins paying for a new car and can't make the payments? Good question! If the customer is two or three payments late, it's time to make a decision. So, the Loan Officer calls the Police Department to inform them that he plans to repossess the car. Often the Loan Officer must go to the customer's house at midnight or at 1:00 am to get the car.

Don't forget, the car belongs to the bank and not the customer. After all, the customer still hasn't paid off the loan. Well, nowadays it's a little more dangerous to repossess a car, and therefore, the bank sometimes hires a company that is specializzed in repossessing cars. The bank calls these specialists "gorillas," and it's their job to find the car and bring it back to mama. However, sometimes when the customer never shows up, the bank is forced to take the car to an auction.

Oh, if you decide to finance a new car in the U.S., drive carefully, fasten your seat belt, don't drink and drive and don't forget to make your monthly payments, because if you do, your bad credit will follow you for years to come.

Answer

1. Why has financing become a big problem in California?
2. What do the banks require if you want to finance a new car?
3. What does the bank do when the customer stops paying?
4. Who are the gorillas and why do you think they are called gorillas?
5. What kind of suggestions is made at the end of the text?

DISNEYLAND

Few places in the world can be compared to Disneyland! And that's exactly the way Walt Disney wanted it to be.

Disneyland opened its doors for the first time in 1955 after years of planning and preparation. As you enter Disneyland your attention is immediately drawn to a large sign which reads, "Disneyland the Happiest Place on Earth."

You may not know but Walt Disney invisioned Disneyland as a happy place, one where the cares of the outside world would be left outside. Unlike the rest of The United States when an important American figure dies, the flag is customarily lowered at half mast. Walt Disney, however, chose not to fly the flag at half mast or in other words, to lower the flag for any reason at Disneyland.

Once again, his vision was for Disneyland to be a happy place, one separated from the worries and concerns of the world. When you visit California, don't miss it!

Airports

Someone once said, **"If you want to see the most beautiful people in the world, visit your local airport!"** Well, that may or may not be true. One thing is true; however, if you want to see people speaking various languages, from different cultures, go to the airport.

Some are there to pick up friends and relatives; others are traveling on leisure or on business. Believe it or not, some people go to their local airports just to watch the planes take off and land.

Others dream about traveling to Cancun, Acapulco, the Bahamas or some other tropical paradise.

In Chicago, the O'Hare International Airport is considered the busiest airport in the world. Gatwick and Heathrow in England are considered to have the greatest diversity of foreign travelers in the world.

Besides Gift Shops, Duty Free Shops and restaurants, most international airports have hotels, taxi service and of course, lots of busy people. One of those busy people was a young student from China who was visiting The United States for the first time.

He didn't speak English very well. He could speak enough to communicate. In Los Angeles he needed to catch a flight to San Francisco where he planned to visit a cousin. When the stewardess said, "Ladies and Gentlemen, in about 10 minutes we will all get on the plane." the young traveler was shocked and became very pale.

He looked at the stewardess and said, "I'm sorry but I'm not getting on the plane, I prefer to get in the plane, if you don't mind!"

1. According to the text, what are all the people doing at the airport?
2. What did the text say about Acapulco?
3. What did the text say about Chicago?
4. What was the Chinese student doing in Los Angeles?
5. Why was he so shocked by the stewardess' announcement?

John warned us that the trail would be difficult and that we would have to cross several dangerous spots to reach the top of Neahkanie Mountain. At first, we made our way up the trail easily and felt that John had been exaggerating, but later we changed our minds. The trail ended abruptly, and there was only a ledge four or five inches wide that circled on around the mountain. We moved to the edge cautiously and looked over. There was a drop straight down of a thousand feet or more. As we inched along the narrow ledge, we felt as if the ledge was going to crumble at any minute. It was quite a relief to reach the other side and find a wide trail again. From the top there was a beautiful view of the coastline, and for a few minutes we put out of our minds the thought of having to face the ledge again.

Summary

1. Did you think the trail up the mountain was easy or difficult? Did you change your mind later on or not? (*but*)
2. Did the trail go on for several miles, or did it end abruptly? Was there a ten-foot drop over the edge, or was there a thousand-foot drop? (*and*)
3. Did you walk on a wide trail, or did you have to walk along a narrow ledge? Did you feel that the ledge was solid, or did you feel as if the ledge was going to crumble at any minute? (*and*)
4. Was it a relief to reach the other side or not?
5. How was the view from the top? Did you know you had to walk along the ledge again on the way down or not? (*but*)

After returning to the surface, the diver told the captain that he had found a metal safe in the sunken ship, but he said that it would be impossible to cut it open underwater. The captain decided that the best thing to do would be to blow the door off the safe. The diver went down again with a number of explosives which he fastened to the door of the safe, and then he came up immediately. After a few minutes, the explosives were set of electrically, sending up a shower of water. When the surface of the water settled again, the diver descended for a third time to examine the contents of the safe. The explosion had torn away the door. Closer examination showed that there were neat piles of gold bars inside the safe. Very excited now, the diver took one of the bars and returned once more to the waiting ship above.

Summary

1. What did the diver find in the wreck? Could he open it or not? (*but*)
2. Did he go down again or not? What did he take with him? (*and*)
3. Did he return to the ship above once more, ore did he stay underwater? Where did he go after the underwater explosion? (*and then*)
4. What did he see inside the safe this time?
5. What did he take? Did he return to the surface at once, or did he stay near the sunken ship? (*and*)

The train I was traveling on was already half an hour late. I had planned to arrive in Chicago at 7:10 in time to catch the 7:50 train to Saint Louis – but there was no hope of that now. I explained the situation to the conductor who advised me to get off at the stop before Union Station and take a taxi. When the time came, he even helped me with my luggage. He wished me good luck as I jumped off, and a few minutes later I was racing towards Unions Station in a taxi. It was almost 7:50 when he stopped outside the station. I paid the driver quickly, grabbed my bags and hurried inside.

"The S. Louis train…?" was all I had time to say to the first porter I saw. You can imagine my disappointment when he pointed to a train that was just moving out of the station!

Summary

1. Was your train to Chicago going to arrive on time or not? What had you planned to do there? (*and)*
2. Were you worried or not? Who did you turn to for help? (*so*)
3. What did he tell you to do?
4. Did you take his advice or not? Were you half an hour late, or did you manage to get to the station by 7:50? *(and)*
5. Did you rush into the station, or did you wait outside for a few minutes? Was the train standing in the station, or was it just leaving? Did you catch it, or did you miss it? *(but) (and)*

Last year we visited a large modern factory where they make glass. We first saw workmen mixing sand and other materials together in certain proportions. Then they added some broken glass to the mixture, since apparently this helps to melt the mixture. They then fed the mixture into an extremely hot oven. At the far end of the oven, a stream of liquid glass poured out. At that point, some men lowered a metal frame into the liquid. As the frame came back up, it pulled away a hot sheet of glass. Special rollers then took hold at the frame at either side and raised it upwards. Our guide told us that at this stage it was necessary for the glass to cool down slowly to give it strength. After the sheet of glass cooled down, another machine cut it into big pieces which the workmen stored away. The glass was now ready for use.

Summary

1. What kind of factory did we visit last year?
2. What did workmen do with a mixture of sand and other materials?
3. What came out at one end of the oven? What did a metal frame pull up? *(and)*
4. Did the glass cool down, or did it stay hot? Did workmen cut it into small pieces, or did a machine cut it into big pieces? *(after)*
5. Was the glass now ready for use or not? What did the workmen do with it? *(and)*

It was the ambition of an eleven-year-old boy in Kansas City, Kansas, to be a railroad engineer. Born without arms, he had been to special schools where he learned to use his feet as "hands." He spent all his spare time watching trains and one day his dreams came true. Seeing a deserted engine in the railroad yards, the boy climbed in. He had no difficulty in starting it up with his feet. Soon he was traveling along at thirty miles an hour. Brakemen in the yards could not see anybody in the cab, so they reported the runaway engine to the trainmaster. Meanwhile the boy reached the Missouri border, stopped the engine himself and then started backing it up. When he was near the starting point, the trainmaster caught up with the engine and jumped aboard. At first he was very angry, but he smiled when the boy said simply, "I like trains." "Well, I'm glad you don't like planes!" answered the trainmaster.

Summary

1. What had an eleven-year-old boy without arms learned to do?
2. What was his ambition?
3. What did he see one day? Did he start it up or not? Did he run it as far as the Missouri border or not? *(and not only…but)*
4. Did he get out then, or did he start backing it up? Who jumped aboard the engine soon afterwards? *(but)*
5. What did the boy say?
6. Did the trainmaster smile or not? What did he say? *(and)*

I always have a difficult time choosing presents. My imagination never seems to get beyond ties, handkerchiefs or perfume, but strangely enough, it did not take me long to decide on my wife's birthday present. For the first time in my life I had a good idea – I would buy her a sound system. At the party, she suggested that I unpack it and put on some music. I set it up but it refused to work, so I decided I would try to fix it. Soon a crowd gathered to watch me, and I could hear all sorts of "helpful" suggestions like "Try winding it up!" "The speakers are upside down!" etc. All of a sudden, I realized the problem and I felt rather stupid – I had not plugged it in, but now I had to wait until nobody was looking. When the music started, I heard somebody say to my wife, "Your husband's a genius! He fixed it!"

Summary

1. Is it always easy for you to choose presents, or do you find it difficult? Did it take you very long to decide on your wife's birthday present or not? *(but)*
2. What did you buy her?
3. What did she ask you to do during the party?
4. Did the guests watch you or not? Did they make "helpful" suggestions or not? Did it start playing, or did it refuse to work? *(and) (but)*
5. What did you realize all of a sudden?
6. Did it still refuse to work, or did the music start a few minutes later? Did anybody find out what had really happened or not? *(and)*

When the woman opened the door, she guessed at once that the man was an escaped convict. There was mud on his face and on his torn clothes. He wanted to know if he could use the telephone. He told her that a "friend" had asked him to make a call. She immediately asked what the friend's name was, but he replied that he had forgotten. This made the woman even more suspicious. She knew that there had been a prison break at Huntsville the night before. Deciding not to take the risk, she closed the door in the man's face. For days she wondered whether she had done the right thing – until she related the incident to a neighbor. Her neighbor exclaimed, "Oh that explains what happened the other night! Henry's car broke down not far from your place. The driver of another car offered to help, so Henry sent him to your house to call me in Huntsville."

Summary

1. What did the man at the door appear to be?
2. Who did he say had told him to come there? Could he remember the friend's name or not? *(but)*
3. Did this make the woman suspicious or not? Did she let the man in, or did she refuse to let him in? *(so)*
4. Did she relate the incident to a neighbor several days later or not? Was she surprised at her neighbor's response or not? *(and)*
5. Did the neighbor explain that her car or her husband's car had broken down that night? Had he sent the man to the woman's house to use the phone or not? *(and that)*

I always settle down comfortably in a barber chair and listen patiently to the barber. He explains the present political situation, women's fashions, or tells jokes which I have heard at least a dozen times already. In twenty minutes I get a haircut and an amazing amount of information as well. But last week our conversation was cut short. We heard loud cries of "Fire!" coming from upstairs. Customers and barbers rushed out of the shop immediately. We were certainly a funny sight to people on the street! I had a white sheet around my neck and my haircut was half finished. The barber was right behind me with a comb and a pair of scissors in his hands. The man who had been in the chair next to me was not so lucky. There was shaving cream on one side of his face and his barber was running after him carrying a shaving brush in one hand and razor in the other!

Summary

1. Do you enjoy your visits to the barber shop or not?
2. Do you learn a lot from your barber or not? Do you get your hair cut, or do you just sit and talk? *(not only…but also)*
3. Did your talk last long last week or not?
4. What did you hear? Did you stay in the shop, or did you all run outside? *(and so)*
5. What did you have around your neck? What did another man have on his face? *(and)*
6. What was your barber holding?
7. What was the other barber holding?

The curving flight path of the Apollo 8 spacecraft would take the astronauts Borman, Lovell an Anders behind the moon and out to touch with Earth. There they would fire the rocket engine to place them into a lunar orbit. For decades men had dreamed of reaching the Moon, and of using it as a springboard to the stars. "One minute to *LOS* …," the voice from Houston said, marking the exact time before loss of signal. “All systems go. Safe journey, guys” the voice continued. From the spacecraft, Anders answered for the crew, “Thanks a lot, troops. We’ll see you on the other side." And then there was silence. LOS was complete. There were no voices, no telemetered data and no tracking. Ten minutes passed. The engine should be firing now. Apollo 8 should be in lunar orbit. Twenty minutes dragged by, then thirty, thirty five… "Go ahead, Houston. Apollo 8." Lovell’s voice came through loud and clear, confirming lunar orbit.

Summary

1. Did the flight path of Apollo 8 take the astronauts to Mars or behind the Moon? Were they out of touch with Earth for just a few seconds or for more than half an hour? *(and)*
2. Did they fire their rocket engine or not? Did they succeed in putting the spacecraft into lunar orbit, or did they fail in their attempt? Could they report to Houston that everything was all right or not? *(and) (but)*
3. Did people on Earth know exactly what had happened, or did everybody wait anxiously for word from the spacecraft? *(Meanwhile…)*
4. Were communications restored, or were they lost completely? Did Lovell’s voice come through loud and clear, or was his voice weak and hard to understand? *(Finally…) (and)*
5. Did he say, "We can’t hear you, Houston," or did he say, "Go ahead, Houston"? Did people wonder what had happened, or did everybody know the mission was successful? *(and then)*

As soon as Mr. and Mrs. Graves moved into their charming old house in the country, they decided to remove all the faded green wallpaper from the walls. They begin with the living room. Mr. Graves got a ladder from the garage, while his wife got a bucket of water. Then they soaked the paper until it became soft. This way, they were able to scrape it off easily. After three hours of hard work, when they were both beginning to feel rather tired, Mr. Graves pulled away a long strip of paper from over the fireplace. He called out excitedly to his wife. The former owner had written these words on the wall: "We hope you enjoy making this room look beautiful as much we did. Don't work too hard. Take a break and have a cup of coffee!" "What a good idea!" said Mrs. Graves, and she hurried into the kitchen.

Summary

1. Did Mr. and Mrs. Graves move into a new house, or did they move into an old one?
2. What was on the walls? What did they decide to do? *(and)*
3. What did they do the paper in the living room? Did it come off easily or not? *(and)*
4. How long did they work? How did they feel? *(and)*
5. Did Mr. Graves call to his wife just then or not?
6. Where had the former owner written the words "Take a break and have a cup of coffee"?
7. Did Mrs. Graves act on this suggestion or not?

Science has told us so much about the moon that it is fairly easy to imagine what it would be like to go there. It is certainly not a friendly place. Since there is no air or water, there can be no life of any kind. There is not much variety of scenery either. For mile after mile there are only flat plains of dust with mountains around them. Above, the sun and stars shine in a black sky. If you step out of the mountain shadows, it means moving from severe cold into intense heat. These extreme temperatures continually break rocks away from the surface of the mountains. The moon is also a very silent world, for sound waves can only travel through air. But beyond the broken horizon, you see a friendly sight. Our earth is shining more brightly than the stars. From this distance, it looks like an immense blue, green and brown ball.

Summary

1. Is the moon a friendly place, or is it an unfriendly place?
2. Is there any air or water there? Is there any life or not? Is there much variety of scenery or not? *(so…neither…nor)*
3. Do the sun and stars shine in a black sky, or do they shine in a blue sky? What effect do the temperature extremes have on the rocks? *(and)*
4. Can sound waves travel on the moon or not? What is the effect of this? *(so)*
5. How does the earth appear from there?

In the darkness, I learned over the railing and watched the ship cutting a path through the waves. It was pleasant to be out on deck on such a beautiful night. But the captain had told me that the ship would arrive at six o'clock in the morning. I therefore decided to return to my cabin because I wanted to get up early to take some pictures as the boat entered the harbor. It was very hot below, and in spite of my good intentions, I lay awake for hours listening to the ship's engines. At last I went to sleep, but the noise of heavy chains and the sound of the ship's whistle woke me up. I dressed hurriedly, grabbed my camera and rushed up on deck. Then I had an unpleasant surprise. I was too late, the ship had already entered the harbor and we were about to dock!

Summary

1. What time did they expect the ship to arrive in the harbor? Did the writer go to bed early or not? *(so)*
2. What did he want to do in the morning?
3. Was it hot in his cabin, or was it cold? Did it take him a long time to get to sleep or not? *(and)*
4. Did the ship's whistle suddenly wake him up or not?
5. Did he get dressed quickly, or did he take his time getting dressed? Did he hurry out on deck or not? Was it too early, or was it too late? *(and) (but*
6. Had the ship already come into the harbor or not? Were they moving along in the harbor or were they docking? *(and)*

TEXT 14

A man driving along a lonely country road saw two men walking by the side of the road. One was on crutches and the other was carrying two suitcases. Since they were this far off the main road, it was obvious that they were not hitchhikers but had simply run out of gas or had car trouble. Feeling sorry for them, he decided to offer them a ride. As he pulled over, however, the two men hurried off the road and disappeared into the bushes. They were in such a hurry that the man carrying the suitcases left one of them behind. Since he had obviously frightened them, the driver got out and called to them to reassure them. Finally, he became suspicious and decided to open the suitcase. It was filled with jewelry, silverware and other valuables. The police told him later that they were stolen goods which, by accident, he had helped to recover three hours after the robbery.

Summary

1. Did a man driving on a country road see two men or not?
2. Was one of the men on crutches or on a bicycle? Was the other one carrying a box or two suitcases? Did the driver decide to give them a ride or not? *(and) (so)*
3. Did the driver speed up or pull over? Did the two men stop, or did they start running? Did they run on down the road, or did they disappear into the bushes? *(but) (and)*
4. Did they leave one of the suitcases lying beside the road, or did they take both of them with them? *(However,…)*
5. Did he take it to the police or not? Did he find out it contained stolen goods, or did he find out that it was worthless? *(and)*
6. Did they accuse him of stealing the suitcase, or did they congratulate him for finding the stolen items only three hours after the robbery?

Henry Ford was the first one to build cars which were fast, reliable and cheap. He was able to sell millions of them because he "mass-produced" them: that is, he made a great many cars of exactly the same type. Henry Ford's father had hoped that his son would become a farmer, but the young man did not like the idea and went to Detroit where he worked as a mechanic. By the time he was twenty-nine, in 1892, he had built the first car. The first mass-produced car in the world, the famous "Model T," appeared in 1908 – five years after Henry started his great Ford Motor Company. This car proved to be so popular that it remained unchanged for twenty years. Since Henry Ford's time, mass-production techniques have become common in industry and have reduced the price of great many products which otherwise would be very expensive.

Summary

1. Did Henry Ford mass-produce cars, or did he make them by hand? Was he able to sell a great many of them, or did he sell only a few? *(so)*
2. What did Henry's father want him to be? Where did Henry go? What did he do instead? *(but) (and)*
3. Did he start the Ford Motor Company or not? When did he build the world's first mass-produced car? *(and)*
4. What did he call it?
5. Was the car very popular or not? How long did the model remain unchanged? *(and)*
6. Have mass-production methods been used in industry for just a few years, or have they been used ever since Henry Ford's time?

Since Mrs. Talbot had carefully locked the front door when she left the house, she was surprised to find it unlocked on her return. When she walked into the hallway, an extraordinary sight met her eyes. A strange man was fast asleep on the sofa in the living room! Taking care not to disturb him, Mrs. Talbot left the house immediately. She went to a neighbor's house and called the police. She hastily explained what happened and added that the man must have picked the lock on the front door. The police arrived in a short while, and Mrs. Talbot returned to her house with two policemen. But it was obviously too late; the man had disappeared. Just then, to her surprise, her husband appeared at the head of the stairs and greeted her. He explained that he had come home from the office early. Then he said, "I have a surprise for you. You've never met my cousin John from Michigan. He arrived this afternoon and I brought him home with me. He's going to spend a few days with us."

Summary

1. Had Mrs. Talbot locked the door when she left the house, or had she left the door open? Was she surprised to find it open or not? *(so)*
2. Was she relieved when she looked in the living room, or was she even more surprised?
3. Who was sleeping on the sofa?
4. Did she sit down in the living room, or did she leave immediately? Did she spend the afternoon at the neighbor's house, or did she come back a little later with two policemen? Was the man still there, or was he gone? *(and then) (but)*
5. Did her husband appear at the head of the stairs just then, or did he come to the front door just then?
6. Who did he say was visiting them? Did she still wonder who the strange man was, or did she realize the man on the sofa was her husband's cousin? *(and then)*

"Now for the run home… I wonder if we can do it,'' wrote Captain Scott at the South pole. The "run home" was a journey of 900 miles on which five men of great courage lost their lives. Fierce winds blew against them across a desert of snow and ice, and they could walk only a few miles each a day. A month later Evans died after a serious accident. Sometime later another member of the party, Captain Oates, could go no farther. One morning he said. " I am just going outside and may be some time." He disappeared into the snow and never returned. Three men now struggled on until they were only eleven miles from their base camp where there was plenty of food. But a terrible snowstorm began and they had to remain in their tent for days, a search party found their bodies a year later.

Summary

1. How many miles was the return journey from the South Pole? Was the weather good or bad? Could Captain Scott and his four companions cover quite a few miles a day or only a few? *(but) (so)*
2. Which two men died on the way? *(Both…and)*
3. Did the other men give up, or did they keep going until they were only eleven miles from their base camp? Did they run into a rainstorm or a bad snowstorm? Did they have to stay in their tent for days or for just a few hours? *(but then) (and)*

Some people do not seem to have a mind of their own. They never express their own opinions and they do not make their own decisions. My brother is one of these people. Last night, for example, he was planning to spend a quite evening at home reading a book. At about seven-thirty, however, his friend Tom dropped by. "Let's watch TV tonight," Tom suggested. "Okay, " my brother said. By ten o'clock my brother was tired and sleepy, and I am sure he wanted to go to bed. But Tom was not tired. "Let's go out and get a hamburger." Tom said. "Good idea, " my brother replied. He very often says things he does not mean and does things he really does not want to do. Worse than that, he does not say the things he would like to say or do a lot of the things he would like to do.

Summary

1. Does your brother seem to have a mind of his own or not?
2. How often does he express his own opinions? Does he make his own decisions or not? *(and)*
3. Did he plan to read a book last night or not? Did his friend Tom drop by or did he call him on the telephone? Did he suggest they read a book or watch TV? *(but) (and)*

By noon, the small groups of boy scouts led by their scoutmaster had reached a height of 2,500 feet. At this point the party had to stop climbing because one of the boys fell and broke his leg. The only thing the scoutmaster could do was return to the mountain cabin where they had spent the night. From there, he telephoned the police. Since no rescue team could reach the boy quickly enough, the National Guard sent out a helicopter with a doctor on board. The helicopter soon arrived on the scene, but the sides of the mountain were so steep that it could not land. However, the pilot lowered the helicopter slowly and carefully toward the steep side of the mountain near the spot where the boy was lying. With one of the skids of the helicopter just inches from the ground, the pilot kept the helicopter hovering in midair while the scoutmaster and his helpers lifted the boy on board.

Summary

1. How high had the scoutmaster and his group of scouts climbed?
2. What happened to one of the boys at this point? What did the scoutmaster do? *(so)*
3. What did he do from there? Did a helicopter quickly arrive on the scene or not? *(and)*
4. Was the mountain very steep or not? Could the pilot land or not? Did he give up, or did he keep the helicopter hovering near on the ground? *(and)*

After crawling out the full length of the steel girder, the welder positioned himself as securely as he could and prepared to lower his face shield to begin the welding operation. As he raised his hand to the helmet, he glanced down toward the ground twenty-two stories below and all of a sudden, he froze. The ground seemed to be moving, and for an instant he felt dizzy, instinctively he pulled back and reached out to grasp the girder firmly with both hands. His hands and arms were trembling and he was struggling to catch his breath. Slowly and cautiously, he leaned forward until his head was resting on the cold steel girder. In his ten years of experience on construction jobs, he had seen several men suddenly lose their nerve for no apparent reason, but he never dreamed it could happen to him. With both arms wrapped tightly around the girder and with his legs locked together, he began to shout for help.

Summary

1. Was a welder working on a structure four stories high or twenty-two stories high?
2. Had he crawled out on a girder or had he climbed up a ladder? Was he preparing to lower his face shield or not? Could he weld a joint or not? *(and) (so that)*
3. Did he look up in the sky just then, or did he glance down at the ground? Did he move all of a sudden, or did he freeze? *(and)*
4. Were his hands and arms trembling, or were they steady? Was he having a hard time breathing, or was he breathing normally? *(and)*
5. Did he wrap his arms around the girder or not? Did he go to sleep, or did he begin to shout for help? *(and)*
6. Did he feel secure on the girder that high up, or did he realize he had suddenly lost his nerve?
